EXPERIENCE

BRIGHAM YOUNG UNIVERSITY -- IDAHO | Data Analyst / TA Supervisor
April 2026 – August 2026 | Rexburg, Idaho

- Designed Workday analytics framework to audit 40+ remote employees; replaced manual tracking with data-driven accountability metrics.
- Identified performance trends and conducted targeted coaching to align distributed team output with operational standards.

BRIGHAM YOUNG UNIVERSITY -- IDAHO | Teaching Assistant (CSE 210 & Agribusiness)
September 2023 – Present | Rexburg, Idaho

- Applied AI-assisted evaluation pipelines to process and standardize feedback across 40 weekly qualitative essays.
- Generated structured code exemplars to help students transition from conceptual to empirical understanding of programming.

LEADERSHIP

AI SOCIETY | President

- Designed curriculum on statistical prompt evaluation and local LLM benchmarking; recruited industry speakers via cold outreach.

PROJECTS

FACTOR | AI Competency Through Objective Results

- Designed multi-way ANOVA framework to measure LLM accuracy across foundation models with empirical performance metrics.
- Segmented results by academic discipline to extract deployment-ready insights for model selection.

STAR IDENTIFIER | Astrophysical Classification Pipeline

- Built hybrid ML.NET + rules-based classifier in C# for stellar profile prediction using physical attribute data.
- Engineered full preprocessing pipeline to filter, clean, and normalize raw astrophysical input matrices for reliable classification.

N-SIGHT | Agricultural Supply Chain Data Pipeline

- Co-built data verification pipeline tracking nitrogen allocation across supply chain nodes from soil to retail.
- Awarded ”Most Deployable Application”; tracked as top-2 finalist by international hackathon judges.

FREEZER PENGUIN | Relational Database Application

- Rebuilt prototype into normalized MySQL schema decoupled from Dart UI; satisfied three simultaneous course rubrics in data modeling.

PROFILE

Data scientist with a double major in Computer Science and Statistics, specializing in statistical modeling, machine learning pipelines, and empirical AI evaluation. Experienced designing ANOVA frameworks, cleaning large datasets, and deploying data-driven systems. Multilingual (Cantonese).

EDUCATION

BRIGHAM YOUNG UNIVERSITY -- IDAHO
B.S. Computer Science & Statistics
Expected Fall 2028 | Rexburg, ID
Double Major
Cum. GPA: 4.0 / 4.0

Awards:
CTE Presidential Scholar
Eagle Scout Award Recipient
Full-Tuition Academic Scholarship
TestOut PC Prep Certificate

SKILLS

STATISTICS & ML
ANOVA & Statistical Modeling
ML.NET • Data Pipelines
Agentic Engineering

LANGUAGES
Python (Polars) • R • C#
SQL • JavaScript

FRAMEWORKS & TOOLS
FastAPI • SQLModel
MySQL • Docker • Git
Proxmox VE • AWS

CONCEPTS
OOP • Agile
Prompt Engineering
DevOps • Data Normalization

PROFESSIONAL
Research • Mentoring
Public Speaking
Multilingual (Cantonese)
